Creating a movement to drive Manitowoc County towards unified planning, action and achievement, resulting in community growth, health and prosperity.

January 3, 2017

(Insert Contact Information)

Dear Community Partner,

Vision 2022 has been working since fall of 2017 to help direct the future of Manitowoc County. We have completed a major community assessment to help understand the perceptions of people in the area and their views on the needs for the future. This process touched over 2500 households in the area and provided essential information to direct our future activities.

Our next project is a Community Inventory. This process is designed to help create a database of the assets in the community and also to better understand unmet needs for future resources. You have been identified as a partner in the future of Manitowoc county. We would like your input in the Community Inventory process.

We ask that you visit www.v22mc.org and download the Community Inventory document. This is a 10 Question process that will help us understand your role in the future and identify resources that could help better achieve your goals. Complete the document and return to me personally at v22mcorg@gmail.com. We will assemble the information and make it available as part of a community asset base for the future.

Thank you in advance for your time and consideration.

Sincerely,

Dean Halverson
CEO, Leede Research

P.S. Join us for the Vision 2022 Summit on January 17th, 2pm, at the Holiday Inn Manitowoc. Learn more at the website!!
