

Vision 2022

Together for Better

Breakdown:

Vision 2022 has 8 action groups, one of which is Healthiest Manitowoc County (HMC). HMC realized changing the health of an entire community is a big job, so they broke down the work into 6 coalitions based on health issues. Each coalition will develop however they see is the most effective way to create positive health impacts. Some coalitions further break the work up into smaller workgroups.

Coalition Notes: One coalition is already in existence; Investing Early. They will continue their work, as well as, add a focus on a new strategy identified during HMC’s community planning sessions which is to improve early literacy practices. The substance abuse and mental health coalition will combine various existing coalitions and committees in the community to encourage more cross collaboration between mental health work and substance abuse prevention. Another reason for this, is to reduce duplication of work. Members of this coalition will serve on 1 of the 5 different workgroups listed above. As the other brand new HMC coalitions start their work in January 2019, they will develop further based on coalition wants and needs.
